

DK20S vs Stahls-Fusion Comparison

Digital Knight DK20S

- **200 lbs** weight due to extremely heavy duty design
- **All-Thread** loading tables for EITHER rear-loading, right-side-up shirt orientation, or front-loading opposite
- Adjustable Height for **over 2" thick** materials! Built for garments AND sublimation/rigid substrates
- Solid heavy-welded construction & cast-iron dual clamp assemblies (**1500 lbs force**) built for constant production
- Largest industrial Digital Display controller with presets, counters, dual timers, pressure & a myriad of features with **3 year Controller Warranty**, user swappable in minutes
- Proven history of over 20 years!
- **Fully Fabricated, Built, Assembled, & Tested in the USA!**

\$1575 – much more machine for far less cost, lasting decades & not just years!

Stahls Fusion

- **140 lbs** flimsier lightweight sheet-metal & plastic parts
- **Only** front loading, shirts must be loaded upside-down
- Very limited height adjustment for fabric only
- Light plastic moldings & thin sheet metal clamps (**light 500 lbs force**) not suitable for production
- Complicated touch screen frustrates users and wastes time. A shorter limited controller warranty, controller is **4 times more expensive**, and hard to replace by user.
- New and unproven, only a few years old
- Most of the Fusion is imported, & lightly assembled in USA

\$2100 – complicated electronics in a light flimsy frame, and far too expensive!

For more info on the DK20S with All-Thread tables & versatility, watch the video here:

DK20SP Auto vs Stahls AIR-Fusion Comparison

Digital Knight DK20SP Automatic

- **220 lbs** weight due to extremely heavy duty design
- **All-Thread** loading tables for EITHER rear-loading, right-side-up shirt orientation, or front-loading opposite
- Adjustable Height for **over 2" thick** materials! Built for garments AND sublimation/rigid substrates
- Solid heavy-welded construction & self leveling industrial air bag (**3000 lbs force!**) built for constant production
- Largest industrial Digital Display controller with presets, counters, dual timers, & a myriad of features with **3 year Controller Warranty**, user swappable in minutes
- Proven history of over 20 years!
- **Fully Fabricated, Built, Assembled, & Tested in the USA!**

\$2550 – much more machine for far less cost, lasting decades & not just years!

Stahls AIR-Fusion

- **152 lbs** flimsier lightweight sheet-metal & plastic parts
- **Only** front loading, shirts must be loaded upside-down
- Very limited height adjustment for fabric only
- Light plastic moldings & air cylinder (**light 600 lbs force**) not suitable for production
- Complicated touch screen frustrates users and wastes time. A shorter limited controller warranty, controller is **4 times more expensive**, and hard to replace by user.
- New and unproven, only a few years old
- Most of the AIR-Fusion is imported, & lightly assembled in USA

\$3800 – complicated electronics in a light flimsy frame, and far too expensive!
