RoHS

The European Union has reacted to the problem of waste electrical and electronic equipment by enacting the following directive: Waste Electrical & Electronic Equipment – WEEE (2002/96/EC), Restriction of Hazardous Substances – RoHS (2002/95/EC)

EU Restriction of Hazardous Substances (RoHS)**Summary**

- The Restriction of Hazardous Substances (RoHS) regulations put into force by each member state implement provisions of the European Parliament and Council Directive the Restrictions of Hazardous Substances in electrical and electronic equipment (2002/95/EC).
- The RoHS regulations ban putting on the EU market new EEE containing more than the levels of lead, cadmium, mercury, hexavalent chromium and both polybrominated biphenyl (PBB) and polybrominated diphenyl ether (PBDE) flame retardants.
- The regulations apply to EEE falling within eight product categories.
- Specific exemptions exist for certain types of EEE as well as certain applications of the restricted substances.
- The regulations come into effect from 1 July 2006.

Corporate Statement

EEE falling within Categories 1,2,3,4,5,6,7, and 10 of the WEEE regulations, Annex IA, are covered under the scope of RoHS regulations. Categories include;

1. Large household appliances
2. Small household appliances
3. IT and telecommunications equipment
4. Consumer equipment
5. Lighting equipment
6. Electrical and electronic tools (with the exception of large-scale stationary industrial tools)
7. Toys, leisure and sports equipment
10. Automatic dispensers

MAC Valves, Inc. has reviewed the typical customer applications for our product against the covered categories and has taken the opinion that the vast majority of these applications do

TYPE - LA

A flexible steel conduit which is both listed by Underwriters Laboratories Inc. and certified by Canadian Association. It offers outstanding protection against wet, oily conditions and is permitted for use in expo concealed locations.

CONSTRUCTION:

The flexible inner core is made from a spiral wound strip of heavy gauge, corrosion resistant, hot-dipped steel. The 3/8 through 1-1/4 inch trade sizes are squarelock formed and include an integral bonding strip is enclosed within the convolutions throughout their entire length. The 1-1/2 through 4 inch trade sizes a with a fully interlocked strip.

The liquidtight jacketing material is of a high quality, rugged, flame retardant flexible PVC compound with oils, mild acids and exposure to sunlight. Refer to the Chemical Resistance chart for further information.

APPLICATION:

This conduit is intended for installation in accordance with Article 350 of the NEC (ANSI/NFPA-70) and 14.5.4 of the ANSI/NFPA-79 Standard for Industrial Machinery:
