

# DC8AP Twin

## Hot/Cold Dual Platen Automatic Sealer

The DC8AP special twin press features a digitally controlled heat platen and vortex-chiller Cold platen in one heat press machine. Using a single loading table, this configuration provides reliable heat sealing and immediate cooling of materials. This is especially useful when the heated materials can not be moved due to risk of deforming the pressed product. Using only a standard air supply, the cooling platen “locks-in” the heat applied product, allowing for safe removal and post-handling of the material.

The dual hot/cold press head swivels effortlessly in place and features safety guards and micro-switches to insure safe & proper activation only when the pressing platens are over the workspace.

### Features

- Automatic air operated pressing
- PSI pressure control gauge
- Fully digital temperature control
- Automatic digital timer
- Solid steel welded framework
- Temperature readout accuracy  $\pm 2^{\circ}\text{F}$
- 70 Programmable presets
- Records number of pressing cycles done
- Lifetime platen / 3-year control warranty
- Elec: 120V-650W-5.5A/ 220V-650W-3A
