

# We've Got Tagging Clothes All Sealed Up

## The Heat Seal Press

The ACHSM2 is a heavy duty, auto-opening, small format heat press. With a heat platen size of 2"x2" the ACHSM2 isolates just the area needing a barcode. The rest of the garment is free from heat. Features an auto-opening magnetic release and does NOT require compressed air and NO linkage to adjust! The ACHSM2 works with standard 110V power, has a backlit digital control, showing both temperature and time. Programmable presets, adjustable alarms, cycle counters, dual press & pre-press timers, and many other features are loaded into this robust digital controller. The ACHSM2 boasts a solid steel welded frame and indestructible base.

Easy to use, low weight and small footprint for use on any table or work-top surface.
