1425SP

DK25SP 20" x 25" Automatic Digital Swinger

Features

- Automatic air operated pressing
- PSI pressure control gauge
- Fully digital temperature control
- Automatic digital timer
- 70 Programmable presets
- Solid steel welded framework
- SuperCoil-MicrowindingTM heater technology
- Accommodates materials up to 1" thick
- Temperature readout accuracy +-2°F.
- User selectable end-of-cycle alarms
- Records number of pressing cycles done
- 3/4" thick cast-in heat platen
- Lifetime warranty on heat platen
- 3-year warranty on control
- 1 year warranty on entire press
- Elec: 220V-4500W-20A
- Dims: 32"L x 25"W x 40"H 440 lbs

The *Digital Knight* **DK25SP** is an air-operated, automatic 20x25 Oversized swing-away heat press with a state-of-the-art control system and heavy-duty solid steel welded framework. The smooth automatic pressing and push-button activation provides a productive, fatigue-free operation. The extended 20x25 size of the heat platen is perfect for sublimation and large format materials pressing. The heat platen uses SuperCoil-MicrowindingTM heater technology, a system of embedded heater windings that wind tightly and closely together throughout the entire platen for extremely even heat, fast recovery & fast heat up times. The controller utilizes an easy to read oversized-digit LCD display to show time and temperature simultaneously, and the temperature readout is accurate within $+-2^{\circ}$. The operator can use the 70 programmable presets for saving common application settings, and the press features a high-accuracy pressure regulator and pressure gauge for specific psi settings. The press is adjustable to accommodate materials from fabric thickness all the way up to 1" thick substrates! This 20x25 sized air-operated press includes a stand and lockable heavy-duty casters as well. For the ease of high-pressure air operated operation and 20x25 platen sized pressing area, the DK25SP is the ideal solution.
