

Digital Knight Universal Stand

(for DK20S/DK20SP/DK20JS/DK20/DK16/Digital Combo)

The *Digital Knight Universal Stand* is an extremely heavy-duty solid steel stand for various Digital Knight heat press machines. It features a heavy steel welded framework, and industrial grade casters. The rolling casters can be locked with the foot pedals, preventing wheel pivoting and movement of the stand. The stand is quickly & easily assembled, and ships inexpensively by UPS. An excellent add-on for existing machines or new press purchases, the Universal Stand works with common heat presses in the Digital Knight line. All hardware & instructions are included for assembly.
